

WE DON'T ~~BURN~~. WE BUILD.

NO SMOKE. NO CARBON. NO LIMITS.

Hylenr Technologies is the **world's first company to achieve reproducible Low Energy Nuclear Fusion (LENR)** with a **Coefficient of Performance (COP) of 1.8**. Our reactor is **non-radioactive** and **does not generate any nuclear waste**.

This isn't an incremental leap.

It's a paradigm shift.

A clean, scalable, and safe fusion breakthrough that redefines the future of energy.

UNMATCHED GLOBAL FIRSTS

Proven Fusion Breakthrough:

Hylenr Fusion has demonstrated a working LENR reactor with reproducible excess thermal energy — a milestone in nuclear science.

First-Ever Transmutation:

Our reactor is the world's first to have successfully created rare earth elements such as Yttrium.

Deep-Tech Investor Confidence:

Secured \$3.5 million in Pre-Series A funding with strong backing from top-tier deep-tech investors.

THE OPPORTUNITY

- **The Energy System is at a Breaking Point.**

Fossil fuels are unsustainable. Renewables are intermittent. Nuclear fusion is the future of energy.

- **Hylenr Closes the Gap.**

HYLENR fusion delivers continuous, clean, base-load power—emission-free and safe. It's the missing piece in the global energy puzzle.

- **Dual Impact, Double Value.**

Beyond energy, our ability to transmute rare earth elements unlocks a second high value revenue stream — helping stabilise global supply chains in critical industries.

THE INVESTMENT ASK

Hylenr is raising **USD 30 million** in Series A funding in exchange for a 15% equity stake, with a minimum ticket size of USD 3 million.

This capital will power our next phase of growth:

- Scale-up to 10 MW reactor
- Build 2 TPH boiler
- Capitalize on the opportunity to commercialize rare-earth minerals achieved by transmutation.
- Global GTM
- Expand our IP portfolio as a technology moat
- Infrastructure build-out to commercialise

Fuel the future: Join us in pioneering the future of clean energy and elemental innovation.

WHY INVEST IN HYLENR?

• First-Mover Advantage

World's only LENR company with reproducible Coefficient of Performance 1.8.
World's first company to validate elemental transmutation.

• Dual Revenue Potential

Two breakthrough pathways: Clean energy generation and rare earth production.
Hylenr can power industrial decarbonization at scale.

• Deep-Tech IP Moat

Proprietary reactor architecture and a growing, patent-backed innovation stack.

• Massive Market Opportunity

Addressing a \$1.5 trillion clean energy market and \$30B+ rare earth materials segment.

• Visionary Leadership

Mission-driven entrepreneurs and scientists with proven execution capability and global ambition.

THIS IS HOW HISTORY BEGINS

Hylenr is not just another energy startup — it's history in the making.

By achieving both fusion and transmutation, we're not iterating — we're leaping.

We're building the bridge from the fossil-fuel age to the fusion age — and it's already happening.

Do you want to be part of creating the future of energy?
