

Grant spend in spreadsheets. Donor reports assembled manually. Audit readiness that takes weeks to demonstrate.

Softype turns disconnected grant, program, and financial systems into **one trusted view of every fund**, so you can track every grant, every dollar, and every donor requirement in real time.

We don't sell software. **We sell the end of the anxiety of not knowing.**

Restricted and unrestricted funds tracked in spreadsheets, with allocation errors that create audit risk. Donor reports assembled manually, pulling actuals, mapping to donor budget lines, formatting templates — every reporting cycle. Grant burn rates tracked informally, so overspend surfaces too late. Field procurement done offline with long email approval chains. Beneficiary payments via mobile money reconciled by hand. And when the donor audit arrives, readiness takes weeks of preparation, pulling data from multiple systems. For most growing nonprofits and development organizations, this is the reality of managing multiple grants across multiple countries without the right systems.

WHAT CHANGES WHEN YOU WORK WITH US

- 

Fund accounting that separates restricted and unrestricted, natively
- NetSuite Social Impact handles fund separation, grant-level cost allocation, and inter-fund reconciliation without spreadsheets. Every dollar traceable to its source.
- 

Donor reporting in minutes, not weeks
- Actuals mapped to donor budget lines automatically. Grant burn rates visible in real time. Reporting templates configured to donor requirements, not built from scratch each cycle.
- 

Field procurement and approvals, digitized
- Purchase requests, multi-level approvals, and expense tracking automated — even for teams working in low-bandwidth environments. No more email chains and paper trails.
- 

Multi-country, multi-currency, audit-ready.
- NetSuite OneWorld consolidates entities across countries and currencies. Donor audits become reviews, not scrambles. Your finance team closes with confidence.
- 

A partner who's done this before
- Softype has implemented ERP for nonprofits and social enterprises across East Africa. We understand grant accounting, fund separation, donor compliance, and the unique operational demands of development organizations.

Trust the numbers. See the whole picture. Move with confidence.

Our Solutions:

- NetSuite Social Impact Edition (Nonprofit Licensing & Grants)
- Fund Accounting & Grant Management (PyanGo SuiteApps)
- NetSuite OneWorld (Multi-Country, Multi-Currency)
- SuiteExtensions (GoApprove, GoBudget)
- Mobile Money Integration
- Offline Workflows
- 24/7 Support
